ESTEBAN FLORES PIZARRO

Programmer Analyst · Data Analysis, IT Support and Operations

Santiago, Chile · esteban.flores.dio@gmail.com
Portfolio: bandiohgames.github.io · linkedin.com/in/esteban-flores-pizarro

PROFILE

Programmer analyst (INACAP) trained in SQL, Python, Power BI and Excel. During my internship at HubLab I built a data module and led Data Control, coordinating the team and resolving requests from users and the client. I focus on organizing information, automating tasks and turning data into clear reports for decision-making; I also automate processes with Python in my personal projects.

EXPERIENCE

Internship — HubLab · company project lab — Mar – May 2026

- Built the meeting-minutes module: Google Apps Script backend connected to Google Sheets (national ID and PIN access, topic board with checklists and comments with mentions, filterable history; ~13,000 lines) and a responsive Bootstrap and JavaScript frontend.
- Resolved issues and requests across the ecosystem, reported by users and by the client.
- When my teammates' internships ended, I took over project leadership (Data Control Lead): ran meetings, delegated tasks, documented the ecosystem and onboarded new members, until handing the role over to the two most senior members.

Administration and HR internships · 3 companies in different industries — Jun 2018 – Dec 2019

- Completed Administration Technician internships (HR specialization) at three companies, including the final internship for my degree; managed inventory in Excel (formulas, pivot tables), administrative databases and digital records.

PROJECTS

FitTracker — training and nutrition web app · *JavaScript · Google Apps Script · Google Sheets* — In development

- Designed the data model across 9 Google Sheets (workouts, nutrition, weight, calendar, inventory, achievements) and an Apps Script backend with 40+ functions and caching.
- Built custom reports and visualizations (history, weight and weekly volume trends, streaks and an activity map) and automated load progression and achievement calculations.

REZAGO — published video game · *Godot 4 · Python* — Released, Oct 2026

- Measured the launch with itch.io and social media analytics; first week: 18,000+ views, 130 page visits and 33 downloads (25 % visit-to-download conversion).
- Organized the content in data files for 8 languages and wrote Python scripts that audit that data and automate packaging for each release.

SKILLS

Data	SQL · Power BI · Excel (formulas, pivot tables) · Google Sheets as a database
Languages	Python · JavaScript · C# · SQL
Web	HTML/CSS · Google Apps Script · Bootstrap · responsive design
IT support	Issue resolution · documentation · user training · VirtualBox · Git
AI	Claude Code, ChatGPT and Gemini as assistants, with my own review
Soft skills	Problem solving · self-directed learning · team leadership · attention to detail

EDUCATION AND LANGUAGES

INACAP — Higher-Level Technician, Programmer Analyst — Graduated, 2026

INACAP — Innovation and Entrepreneurship (I+E): MVP for real users in interdisciplinary teams — 2024 – 2025

Colegio Técnico Profesional República Argentina — Technician in Administration, HR specialization — Graduated, 2020
